Today I got serious about the weather radar and finished most of the programming required to get it going. 5" LCD in a real Bendix radar chassis:

http://www.youtube.com/watch?v=6f4_Zg5h1lQ

I'm very pleased with the results. :)

Matt

Looks outrageous!! congrats!!
btw where are you getting your weather from?

Great job Matt!  Where did you get the LCD from?  What's the resolution?

You might get a better visual result if you were to place a lightly smoked
acrylic bezel in front of the LCD.

Ahh, ok.  I watched it on a machine via RDP that doesn't have audio.
Thanks.
