Don't rest your soldering iron on a large roll of shrink-sleeving ...

sigh

Um... Wow.

I had a friend that had a habit of licking the end of a pencil before he
used it. He did that with a soldering iron. Once. :)

LOL !! It was worth the roll of sleeving to hear that :-)

....or let your soldering iron come in contact with that very expensive, and very new jersey your wife just bought you. You know the one, the one you're not meant to be wearing when you are out in the garage working on that "silly toy aeroplane" .... that one.

So Roy.. should that now read ".... on a *formerly* large roll of..."?

Ha ha. I did that one. I used to wipe my soldering pencil off on the shirt tail of my old cotton work shirt sometimes.

Don't try it on the brand new 75.00 Woolrich Polar Fleece pullover you got for Christmas three days ago!

I still haven't lived that one down.

Once when I was in High school I was laying in bed and wanted to read a

book. My bed lamp wouldn't turn on, and after a bit of fumbling I found it was unplugged. So I plugged it in, and found it still wouldn't work. So I said eff it and went to sleep. Or at least tried to... A short time later I'm puzzled by a very nasty smell in my room - and no, not the "we went to Taco Bell for dinner" nasty smell, that one doesn't usually puzzle me. Anyway, I pop on the lights in my room and find my soldering iron laying next to the bed melting very nicely into the carpet and the plastic chair mat by my desk (it was laying kind of half-on half-off). Turns out I had plugged that in instead of my lamp! It was a Radioshack cheapie with no switch or anything like that....

Nothing to help keep you from sleeping like almost burning down the house.

Brian
