Chris,
Geocities was closed by Yahoo who only gave me a 2 week window to transfer the site. I didnt see the email and they deleted over 10 years of files, which I didnt have backed up. So my website is history.

It appears that your www.phantomsim.org link is bust or that is their website might be downâ€¦.

Check to see under the original Geocities (www.geociti.es) address if
your site was saved. You can also look for it in the url lists they have.
