Subject: [simpits-tech] FSX instruments on a second monitor
Posted by brian on Tue, 27 Sep 2011 16:22:04 GMT
View Forum Message <> Reply to Message

I'm sure this will end up being a really simple question for most of you, but I've done a bit of googling and I'm not having much luck.

I've got a dual monitor setup, and what I'd like is to have some basic instruments I can toss on my second monitor. Nothing fancy or even aircraft specific, just your standard airspeed, altitude, VSI, etc.

I've been playing around with Just Flight's DC-3/C-47 addon, and I prefer to fly in VC mode but then the instruments aren't easily visible. My workaround at the moment has been to switch to 2d view and drag the cockpit onto the second monitor, then switch back to VC view, but obviously this is a bit clunky, I'd like something a little better (preferably something I could set up to be persistent across aircraft and flights).

Suggestions?

Brian

Cool! Not a bad price at all.

Speaking of the F-4 sim, any more words on how bad the damage is? I
really hope you can resurrect it, that was a great sim.

Hi Brian. I am not up on FSX, but have you tried to save your flight setup
the way you want it? That is how we do it in FS9. Not sure it will work

but give it a shot.
